

Safety Valve Flame/Arrestor

relieves excess pressure.

Thru-Partition Construction

provides shorter current path with less resistance than "over the partition" construction - you get more cranking power when you need it!

Special Active Material

is compounded to withstand vibration, prolong battery life and dependability.

Special Grid Design

withstands severe vibration, assures maximum conductivity.

Special Separator

makes the battery spill-proof. Valve regulated design eliminates water loss and the need to refill with acid.

Heat Sealed Case to Cover

protects against seepage and corrosion - bonded unit gives extra strength.

Polypropylene Cover and Container

assures reserve electrolyte capacity for cooler operating temperatures; gives greater resistance to gas and oil - and impact in extreme weather conditions!
